Press release

QiO Launches the Compact CXNINEx with 3X3 NINE

Premium e-compact bike for powerful mobility, outstanding comfort, and maximum everyday usability

Adelmansfelden / February 2026 – With the new Compact CXNINEx Unisex, QiO introduces the latest flagship model in its compact bike lineup—an e-bike that redefines modern mobility. Powerful, comfortable, and consistently low-maintenance, the Compact CXNINEx combines high-quality components with a well-thought-out overall concept. For the first time, it features the 3X3 NINE gearbox hub, seamlessly integrated into the bike's premium setup.

Equipped with the powerful Bosch Performance Line CX mid-drive motor, including the Smart System, the Compact CXNINEx delivers dynamic and finely tuned assistance up to 25 km/h. The result is a smooth, confident riding experience that excels both in urban environments and on rural routes or longer tours.

Comfort that makes the difference

The Compact CXNINEx is clearly designed with rider comfort in mind. A suspension fork with 80 mm of travel, combined with a suspension seatpost, significantly reduces shocks and vibrations—even on cobblestones or rough terrain. Its compact and well-balanced handling makes the bike especially versatile and intuitive to ride.

Efficient drivetrain with premium components

With the 3X3 NINE gearbox hub, QiO relies on a modern, sealed shifting system featuring nine harmoniously tuned gears. It ensures precise, reliable shifting and supports a smooth, efficient riding experience. Paired with the Gates CDX belt drive, the result is an exceptionally clean and durable drivetrain—ideal for riders who use their e-bike daily and value minimal maintenance.

A powerful 800 Wh battery ensures extended range, reinforcing the Compact CXNINEx's position as a fully capable e-bike for both everyday use and touring.

Top-level safety and visibility

Hydraulic 4-piston disc brakes provide reliable stopping power in all weather conditions. For optimal visibility, the Busch+Müller IQ-XS high beam mED headlight illuminates the road with 100 lux in low beam and up to 150 lux in high beam mode—perfect for riding in darkness or poor visibility.

Price & availability

The QiO Compact CXNINEx Unisex will be available from March 2026 through authorized dealers. The recommended retail price is €5,999.00*.

With the Compact CXNINEx, QiO demonstrates how uncompromising technology, exceptional comfort, and modern design can come together in a compact premium e-bike—built for people who expect more from their everyday mobility.

About 3X3

3X3 is redefining the cycling experience. Guided by the vision “SHIFT YOUR RIDE,” 3X3— a brand of H+B Hightech GmbH—develops innovative drivetrain solutions for bicycles that place simplicity, dynamics, and durability at the core.

The 3X3 NINE gearbox hub, engineered and manufactured in Germany, stands for effortless operation, maintenance-free technology, and maximum reliability. Technical precision combined with uncompromising design creates an entirely new riding experience—for urban mobility and sporting freedom without compromise.
