## Maximum versatility meets uncompromising drivetrain technology: The new SUGG Cargo & Kids with 3X3 NINE E-Shift

Adelmansfelden / Brussels, March 2026 – With the new SUGG Cargo & Kids, Belgian manufacturer SUGG introduces a compact, well-thought-out cargo bike designed for everyday urban use – built for those who refuse to compromise on either transport capacity or riding enjoyment. At the heart of the drivetrain is the exceptionally robust and high-performance 3X3 NINE E-Shift gear hub, setting new standards in reliability and performance.

### Compact, versatile and built for everyday use

The SUGG Cargo & Kids combines maximum functionality within a minimal footprint: while two children can comfortably be seated on the rear, the foldable and collapsible front platform provides ample space for bulky cargo. Despite its versatility, the bike remains exceptionally compact and can be easily parked even in tight urban environments.

### High-end drivetrain: 3X3 NINE E-Shift

For demanding daily use, SUGG relies on the **3X3 NINE E-Shift** – a gear hub specifically engineered for high loads and powerful e-drive systems.

Paired with the powerful **Bosch Cargo Line motor (100 Nm)**, the 3X3 NINE delivers exceptionally smooth, durable, and low-maintenance performance. Even under heavy loads, the system impresses with precise electronic shifting and maximum reliability – a key advantage in urban cargo applications.

The addition of a **Gates Carbon Belt Drive** further enhances the drivetrain, making it virtually maintenance-free and particularly long-lasting – ideal for intensive daily use.

### Premium components for maximum durability

In addition to its drivetrain, SUGG consistently relies on high-quality components:

- Magura dual-piston disc brakes for reliable stopping power
- Brutus wheels for maximum stability

- Schwalbe Pickup tires for high load capacity
- Sumo kickstand for secure parking, even when fully loaded

Each bike is carefully assembled in the heart of Brussels.

### Design meets function

The SUGG Cargo & Kids stands out not only for its functionality but also for its design: selected color options underline its premium character and clean design language.

### Technical specifications at a glance

- **Type:** Cargo bike
- **Drive unit:** Bosch Cargo Line (100 Nm)
- **Gear system:** 3X3 NINE E-Shift
- **Battery:** 545 Wh
- **Drive system:** Gates Carbon Belt
- **Weight:** 34 kg
- **Size:** 150–190 cm
- **Price:** €6,500
